

The Total Store Operations Experience

Upshop has been building store operations technology for 30+ years to provide simplified, smarter, more connected SaaS-based solutions for retailers and associates alike.

Synchronize Store Operations

Solve the most critical challenges

Fresh Forward: Deliver Total Store Freshness

Provide forecasting, real-time ordering, inventory intelligence, and visibility needed to meet consumer demand and boost profitability; across all Fresh product and processes like production planning and recipe management

People Engagement: Maximize labor efficiencies

Get the most out of your people: AI-directed workflows and connected cross-store tasks save energy and streamline team operations

Omnichannel Ownership: Deliver an ownable eComm operation

Deliver ownable, profitable eCommerce fulfillment operation. Connected labor-efficient picking, seamless fulfillment orchestration, and marketplace order aggregation provides a synchronized platform for eComm success

Fresh

Gain visibility into total store fresh operations with solutions built to plan, analyze, and deliver on fresh—every day.
